

The most distant galaxies in the universe can be seen by ALMA

PI: Include here the name of the PI

1 Abstract

Include here the abstract of your proposal (optional)

2 Scientific Justification

While we may be able to see the most distant galaxies with ALMA, everyone knows that planets are way way cooler, so we should look at them instead.

Enter the scientific justification here, together with any figures and tables that you judge necessary.

Table 1: *Here we show the continuum sensitivity required per band.*

Frequency (GHz)	Sensitivity (mJy)
100	0.01
300	0.10

You can structure the scientific justification using the two subsections below (optional).

2.1 Scientific rationale:

2.2 Immediate objective:

3 Potential for Publicity
